CAREER OBJECTIVE

Aspiring AI and backend development professional pursuing B.Tech in Artificial Intelligence and Data Science, seeking an entry-level technical role where I can apply my skills in backend engineering, machine learning, and software development to build scalable systems, contribute to real-world projects, and grow through continuous learning.

EDUCATION

Velammal Engineering College B.Tech — Artificial Intelligence & Data Science	<i>2023 – Present</i> CGPA: 7.79/10
--	---

Bhaktavatsalam Vidyashram (CBSE) Higher Secondary (Class XII)	<i>2022</i>
---	-------------

D.A.V. Senior Secondary School (Boys) Secondary (Class X)	<i>2020</i>
---	-------------

TECHNICAL SKILLS

Languages: Python ,HTML ,CSS
Frameworks / Libraries: TensorFlow, DeepFace
Data / Tools: PySpark, Pandas, NumPy, OpenCV
Developer Tools: VS Code, Cursor, Anti-gravity

PROJECTS

Backend Engineer — velammal.edu.in (Live Website Platform) • Working on backend development for the official live website platform velammal.edu.in . • Developing scalable REST APIs using modular controllers and middleware architecture. • Maintained structured payload formats and handled insert/update/delete workflows for admission modules. • Improved backend stability through validation, exception handling, and consistent API responses.	<i>2025–2026</i>
--	------------------

QA Examination System — Proctored Aptitude Testing Platform • Developed backend modules for a SHL-style online examination platform used for aptitude assessments. • Built secure APIs for authentication, exam session management, test submission, and activity logging. • Implemented validation workflows and database operations to ensure reliable exam processing.	<i>2025–2026</i>
---	------------------

Aura QC — AI-Powered Quality Control System • Developed an AI-based quality inspection system for automated defect detection and quality assurance. • Designed to improve inspection accuracy and reduce manual quality control effort.	
--	--

Facial Expression Detection System — DeepFace + Tkinter • Built a real-time facial emotion recognition system using DeepFace, OpenCV, and Tkinter. • Captures emotions, stores session logs, and generates reports for analysis.	
---	--

CERTIFICATIONS

- Coursera — Introduction to Game Design (Epic Games Game Design)
 - Imarticus Learning — PySpark Certification Course
 - NPTEL — Natural Language Processing
-

CLUBS & EXTRA CURRICULAR ACTIVITIES

- Youth Red Cross (YRC) — Velammal Engineering College: **Media Manager**, handled professional social media accounts of YRC VEC and managed information retrieval activities demonstrating leadership and data handling skills.
 - Actively pursuing game development through self-learning and hands-on projects, including the development of **Trials of Ascendence**, an original game project focused on gameplay systems, player mechanics, and level design using Unreal Engine.
 - Secured **3rd Prize** at **Tech Expo 2026** conducted by Velammal Engineering College for presenting **Emotional Plant Pot**, an innovative mini-project that uses facial emotion recognition to interact with users and promote emotional well-being.
-
